

Botan::PK\_Ops::Signature

Botan::PK\_Ops::Decryption

Botan::RSA\_Private\_Operation

```
graph BT; A[Botan::RSA_Private_Operation] --> B[Botan::PK_Ops::Signature]; A --> C[Botan::PK_Ops::Decryption];
```

The diagram illustrates a relationship where Botan::RSA\_Private\_Operation is a base or parent class for Botan::PK\_Ops::Signature and Botan::PK\_Ops::Decryption. A horizontal line connects the two top boxes, with a vertical line descending from its center to the top of the bottom box. From this vertical line, two arrows point upwards to the bottom of each of the two top boxes, indicating that the bottom class inherits or provides implementation for the operations defined in the top classes.
